

Dr. Karen J. Dover, M.D.
laser & cosmetic medicine

It was a whirlwind weekend at the National Women's Show, but a very successful re-introduction of CoolSculpting by Zeltiq to an extremely warm and welcoming Ottawa public.

Thank you all for a wonderful reception. It was such a pleasure to meet you and share the basic science and the brilliant technology of CoolSculpting. As the exclusive physician in the region to provide the therapy, I feel very privileged and in turn, attempt to provide a customized, highly-personalized approach.

As you might have discovered while speaking with me, other scientifically-based and established cosmetic and aesthetic treatments are available at
KJD-MD.

They include Thermage CPT for effective skin tightening of the face and neck, eyes and body, as well as various lasers and light sources for scars of

neck, eyes and body, as well as various lasers and light sources for scars of all sorts, stretch marks, aging skin, brown spots, and vascular issues, such as rosacea, abnormal vessels and redness.

Of course, Botox and facial fillers are a favourite for rejuvenation, as well as for volume enhancement and/or contouring.

Used in concert, these techniques can work wonders to achieve a non-surgical, non-invasive, low-risk and most importantly, natural improvement.

It is certainly a refreshing way to looking as good as you feel, but still looking like yourself.

Further information about the clinic and the various procedures is always available by phoning the office at 613.715.9900, by e-mailing drdover@kjd-md.com,

and by reviewing the website at www.kjd-md.com.

We are always happy to share any knowledge and experience with you.

As I delegate none of my services, I will be the one you will see in consultation, and I perform all my procedures and follow-up visits personally.

The clinic is discrete, chic, and private, and highly unique in nature.

It would be my pleasure to receive you as a patient.

Please feel free to call to reserve a consultation to review your aesthetic needs, wishes and dreams.

Hopefully, together we can establish a plan to make them a reality. Until then, thank you again for sharing a part of your weekend with us.

Cheers for now,

Dr. Karen J. Dover, M.D.
laser and cosmetic physician
