

Dr. Karen J. Dover, M.D.
laser & cosmetic medicine

The new spring make-up is finally here!

glominerals is a beautiful line of skin-nurturing make-up, which uses advanced formulations to provide pharmaceutical-grade ingredients, natural high-pigment minerals and powerful anti-oxidants. All this to provide a beautiful, flawless appearance, protecting and correcting all the while.

- Triple-milled, micronized, superior-quality minerals, specifically zinc oxide and titanium dioxide, provide the beautiful, ethereal look unique to **glominerals**
- Anti-oxidant power—Vitamins C, A, K, E and green tea extract infused into the products blend to help protect and repair your skin

- Perfume-free and chemical dye-free formulations make **glomínerals** ideal for sensitive skin, and the non-comedogenic nature of the products allows the skin to breathe, for those prone to acne and rosacea break-outs
- **glomínerals** colour palette—the hottest hues and richest colours are offered to create a perfect match—loose and pressed powders, sheer tints, shimmers and blushes all set the stage for the beautiful lipsticks and lip glosses

I had been searching for make-up coverage for my patients that would provide an extremely natural look, while providing broad-spectrum UV protection. Combating free radical damage was an added bonus. The ‘look’ was the deciding factor, though, and it was definitely **FABULOUS!!**

We have been enjoying the products personally over the past few months, and have absolutely loved them. Now that our ‘rigorous trials’ are finally complete, **glomínerals** is available to all of you.

During the next few weeks, we are providing private make-up consultations for our patients, during which time the full product line can be explored, and colour assessments will be done.

It is recommended that an appointment be made with Judy for such a visit, as she will be setting aside the time exclusively for you.

La Roche-Posay products are also now at KJD-MD, and they certainly need no introduction. Many of you have received samples of your favourites over the years, and we know you have enjoyed the products fully.

We are finally providing trade-size creams for your convenience, so please feel free to stock up for the summer.

Prices will be kept well below those of local pharmacies.

Some of the La Roche-Posay products are only available through MD's offices, including chemical peels for home use.

These are certainly offered at KJD-MD, along with a chemical peel program specifically for in-office application.

Judy will inform you further, if this is of interest to you.

I promised to keep this short, as many of you have gardens to tend, bikes to ride, and festivals to attend....

Please come in for a visit....

You are always welcome....

Best regards,
KJD-MD
