

The September Re-entry

As much as we should be accustomed to the annual return from summer activities to re-establishing fall routines, it is invariably brutal, nonetheless.

In an attempt to give you a chance to breathe, I have postponed my newsletter

accordingly, but I can delay no longer.

There is just too much to share....

It has struck me repeatedly that those who have a dedicated approach to skin

care are rewarded with the best results.

Why is this so?

Aging is a process that begins at birth....

Changes occur that are a result of the natural maturation process, modified

constantly by the effects of environment.

It is known as the balance of nature and nurture.

It is true for all aspects of our health, but most apparent in our skin.

The kinder and more regular the nurturing, the healthier the end result.

With this in mind, I am always open to the very best skin products to compliment the treatments provided in office. I am very happy to share THREE NEW RELEASES, which I am introducing to the line of exceptional skin care presently recommended.

There is something here for everyone, and each integrates well into your established regimens.

(drum roll.....)

RADIANCE SERUM, from VivierSkin, is an anti-aging and brightening elixir for all skin types.

It is uniquely formulated to reverse the appearance of age/sun spots, smooth

fine lines and wrinkles, and improve skin tone.

The three key ingredients include:

- 1) Vitamin C, a potent anti-oxidant that boosts collagen production, protects the skin, and smooths texture and tone
- 2) Arbutin, a plant extract that lightens and brightens naturally

3) Resorcinol, which gently exfoliates, softens and brightens the skin.

RETINOL 1% NIGHT REPAIR, a slow-release formula which is an enhanced anti-aging complex.

Benefits include promotion of cell renewal, increased collagen production, wrinkle improvement and prevention, skin firming, fine-line smoothing, and pore-size refinement.

Revitalization during sleep, the perfect addition to most VivierSkin regimes.

AHA/BHA EXFOLIATING CREAM....a 3-in-1 solution for flawless skin.

This long-awaited formulation is a unique combination of five exfoliants, two anti-oxidants, and a peptide.

This magical blend leads to a youthful complexion by

1) addressing problematic skin by unclogging pores and reducing blemishes

through antimicrobial, lipophilic, and keratolytic properties

2) reducing free-radical damage and environmental stress through antioxidant

activity

3) helping skin repair through signal peptides

4) providing a regular, gentle exfoliation, revealing a fresher, smoother look.

Yes, this cream can benefit most everyone...

Please feel free to discuss the suitability of any or all of these products for you.

We welcome you to experience the beauty of revitalizing results.

Here's wishing you a vibrant, productive autumn, one which brings you the richness you deserve.

Cheers for now,

KJD-MD
